

Updates on the Exportation of Textiles to EU Market

The revised textiles control arrangements for export to the EU market had been implemented with effect from 29 June 2009. The grace period for amendments of the PN covering cut-and-sewn garments destined for the EU will come to an end on 12 Oct 2009. Furthermore, Government has made a change to confine the printing of CO collection slip function to Exporter only. To cope with the above changes, Tradelink will deliver a "Smart Upgrade Directive" to your Inbox of the ValuNet Deluxe software shortly.

Upon receipt of the upgrade, please logout and re-login the ValuNet Deluxe software. The upgrade software will be downloaded automatically and executed automatically once customers login ValuNet Deluxe on or after 12 Oct 2009.

For more details of the arrangement for export to the EU market, please refer to the Trade and Industry Department website at:

http://www.tid.gov.hk/english/aboutus/tradecircular/all_in_one/2009/as052009.html
