

Migration of Electronic Services of Certificate of Origin and Production Notification to Government Electronic Trading Services Platform

Tradelink would like to bring your attention to the Certificate of Origin Circular No. 5/2006 issued by Trade and Industry Department (TID) on 31 March 2006 which informs traders of Government's plan to migrate the electronic services of Certificate of Origin (CO) and Production Notification (PN) to the Government Electronic Trading Services platform (GETS platform) in late June/early July 2006.

In compliance with the Government's migration plan, customers using the "ValuNet Standard on Internet" and "SilkNet Standard on Internet" must upgrade to "**ValuNet Deluxe 5.3**" which supports the GETS requirements. Upon migration, GETS compliant features of the upgraded software for customers will be activated automatically.

ValuNet Deluxe 5.3 offers many new features and capabilities to meet the latest government standards and protocols. The software was built as a single and integrated solution for customers to handle their Import & Export Trade Declarations (TDEC), Certificates of Origin (CO), Production Notifications (PN) and Textiles Trader Registration Scheme Notifications (TTRS), all at one place without switching between different software platforms.

ValuNet Deluxe 5.3 runs only on computers with the following system requirements recommended by Tradelink: *Windows 2000/ XP and Pentium III 650mhz or above, and 256MB RAM or above.* Customers with computers that do not meet the minimum requirements are requested to upgrade their computer hardware before **ValuNet Deluxe 5.3** can be installed. Customers can call us for special promotions that computer vendors may offer to Tradelink customers from time to time.

In order to allow customers maximum efficiencies and conveniences in this migration exercise, Tradelink is pleased to offer all customers *free* on-site service for the installation of **ValuNet Deluxe 5.3**. We will contact you in due course to confirm the date and time of the on-site installation. *If your software installation is currently in China, please let us know by returning the reply slip below so that we could make special arrangement for your software upgrade in China before the deadline date.*

Should you have any questions, please call our Customer Service Hotline at (852) 2917 8855.
