

**IMPORTANT NOTICE**

**Critical Upgrade for Electronic Services of  
Certificate of Origin (CO)/Production Notification (PN)/Textiles  
Notifications to be effective as from 2005**

With reference to the Notices to Exporters on “Textiles Control Arrangements from 2005 Onwards” and “Textiles Control Arrangements for 2005” dated 15 October and 30 November 2004 respectively issued by the Trade and Industry Department, a critical upgrade should be performed on your existing Tradelink Customer Software (*ValuNet Deluxe / ValuNet Standard on Internet/SilkNet Standard on Internet*) for the purpose of using the electronic services of CO, PN and textiles notifications under the Textiles Trader Registration Scheme (TTRS) after 2004.

In this connection, traders are reminded to note that as far as textiles notifications are concerned, the field “Textiles Control Registration (TCR) Number” should be **“blank”** for all submissions on or after 1 January 2005, else the messages will be rejected.

The upgrade will be sent to customers’ INBOX of their Tradelink software within next week. When customers log into Tradelink software on or after 1 January 2005 for the first time in the year, the upgrade will be executed automatically. For TTRS customers, the upgrade will be executed once it is received.

Should you have any enquiries, please call the Customer Service Hotline at 2917 8888.
